PERSONAL SUMMARY

For me, programming started as a hobby, playing around with simple things. Soon enough, I realized that I was spending more and more time doing just that. It was consuming. I could spend hours doing it, and at this point I understood ... I wanted to pursue this further, seek deeper.

Now, after education in full-stack web development, I am emerging as a junior developer, ready to take on new challenges. Even though, i am a junior in web development, I do bring a lot of experience in teamwork, work ethic, communication as well as responsibility, adaptability, loyalty and eagerness to deepen my knowledge. I am excited to see where this journey will take me.

WORKING EXPERIENCES

Full-stack developer
2024/05/26 - ...

Freelance
Working on various projects.

Junior developer /
apprentice
2024/03/17-2024/05/05

Wise Monks
I have worked on a fintech project.
My task was to program a data collector from various Api sources. Used Python, Redis, MongoDB. Worked closely with senior developers to learn best practices.
